Work Experience

UI/UX Designer & Developer

Proglint, Dec 2021 – May 2026

- Designed and delivered 35+ responsive web pages across web and mobile, improving cross-device usability by ~25% through optimized UI/UX workflows and high-fidelity interfaces.
- Redesigned company websites and logos, enhancing user experience, accessibility and strengthening brand consistency.
- Conducted UX research (user interviews, heatmap analysis, A/B testing, competitive analysis), translating insights into design decisions that reduced drop-off rates on key landing pages.
- Produced 50+ marketing creatives (social media, brochures, ID cards) using typography and colour theory principles, increasing audience engagement by ~20%.
- Converted Figma designs into responsive front-end interfaces (HTML5, CSS3, Bootstrap, Tailwind CSS), reducing developer handoff iterations by ~30%.
- Collaborated in Agile/Scrum cross-functional teams (developers, PMs, QA) across the full design lifecycle – wireframes, prototypes, design systems, and launch.
- Delivered visual storytelling presentations to clients and stakeholders, clearly communicating UX rationale and design solutions.

Projects

UI/UX Design: Performed full UX research (user interviews, heatmap analysis, information architecture planning, competitive analysis) and translated findings into wireframes, UI components, and a scalable design system. Designed visual UI for 35+ landing and product pages, improving user comprehension of product features – contributing to measurable improvements in page engagement metrics.

Tools Used

UI Developer: Built modern analytics dashboards and admin panels with intuitive data visualization, improving operational efficiency and decision-making processes. Created interactive kiosk UI designs focused on accessibility, touch-friendly interactions, and optimized user workflows.
